SONICS & MATERIALS, INC.

Model T202WD Pouch Sealer

NEW T202WD ultrasonic pouch sealing systems

- NEW low profile design fits into tight spaces
- NEW Ambidexterous design enables mounting from left/right or above/below
- NEW design for enhanced wash-down and improved serviceability
- Hermetic seals even when internal product contaminates the seal area
- Higher percentage of leak-free seals than heat sealing
- More consistent seals than heat seal technology
- Cool ultrasonic tools enable sealing of heat sensitive products without thermal damage
- Data output for process control is available

SonicsEdge:

The industry's strongest seals with new patented seal pattern, plus

- Industry first self-leveling tooling
- User-friendly design and easy to maintain
- Process control to identify folded pouches
- Systems available to suit large and small pouches
- Ethernet IP communication available
- Industry first wash-down generator with touch screen interface
- Cost-effective retrofits for existing pouch filling machines

Optional wash-down generator with touch screen interface
