

**SONICS**<sup>®</sup>  
SONICS & MATERIALS, INC.

Model T201WD Pouch Sealer  
shown with optional support  
column

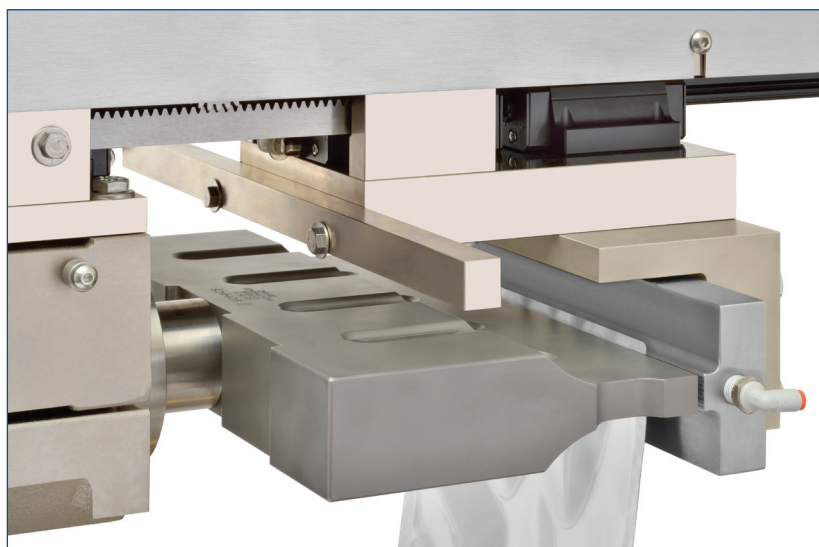

## ultrasonic pouch sealing systems

- *Hermetic seals even when internal product is present in the joint area*
- *Higher percentage of leak-free seals than heat sealing*
- *More consistent seals than heat seal technology*
- *Cool ultrasonic tools enable sealing of heat-sensitive products without damage*
- *Data output for process control available*

### **SonicsEdge:**

**The industry's strongest seals with new patent-pending seal pattern, plus**

- Best value in ultrasonic sealing upgrades
- Turnkey retrofit capabilities for existing machines
- Systems available in various frequencies to suit your application
- True Ethernet IP communication capability
- Designed to be user-friendly and serviceable
